

HARISH K

Full Stack Developer | 6369151728 | bavaharishkumar@gmail.com
Portfolio | LinkedIn | GitHub

SUMMARY

Results-driven Computer Science student and Full Stack Developer with hands-on experience in the MERN stack and Python. Expertise in building scalable web applications, designing RESTful APIs, and managing **PostgreSQL** and **MongoDB** databases. Proven track record in national hackathons and optimizing backend performance.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), SQL (**PostgreSQL**, MySQL)
Frameworks/Libraries: React.js, Node.js, Express.js, Flask, Tailwind CSS, Pandas, NumPy
Databases/Cloud: **PostgreSQL**, MongoDB, MySQL, Vercel, Firebase
Tools/Concepts: Git, GitHub, Postman, Figma, REST APIs, MVC, JWT, OOP, DSA

EXPERIENCE

Java Intern May 2025 – Jun 2025
1Stop Remote

- Developed modular Java applications using OOP principles, resulting in a 20% improvement in code maintainability.
- Optimized database connectivity via JDBC and SQL, successfully reducing application debugging time by 60%.
- Engineered backend logic for data processing modules, decreasing average server response time by 15%.

PROJECTS

Self Shopping Smart Trolley (SIH 2024) | React, Flask, MongoDB, Tailwind CSS Aug 2024 – Present

- Architected a retail automation system that reduced customer checkout wait times by 40% using real-time tracking.
- Integrated **PostgreSQL** for inventory logging and Flask APIs to sync hardware sensor data with a React dashboard.
- Led a cross-functional team of 6 to develop the MVP, managing deployment on Vercel: [\[Live Link\]](#)

Clinic Booking System | React, Node.js, MongoDB, Tailwind CSS Nov 2025 – Present

- Engineered a healthcare portal with role-based access control, securing sensitive data for 100+ simulated users.
- Implemented JWT authentication and RESTful APIs, improving system security and scheduling efficiency by 30%.
- Designed a mobile-first UI with Tailwind CSS; [\[Live Link\]](#)

Bank Management System | Python, Flask, MySQL May 2024 – Jun 2024

- Developed a secure banking portal using MVC architecture to manage high-frequency transaction logging.

ACHIEVEMENTS

- **3rd Prize, Hackovation 2.0 (VIT Chennai):** Secured rank among 100+ teams in a national 32-hour hackathon.
- **1st Prize, Paper Presentation (RAGEX'25):** Awarded for research on "Automated Retail Intelligence".
- **LeetCode Proficiency:** Solved 250+ DSA problems, ranking in the top 20% of monthly coding contests.
- **Leadership:** Selected as Project Lead for Smart India Hackathon (SIH) 2024, overseeing full-stack development.

EDUCATION

PSNA College of Engineering and Technology Dindigul, India
Bachelor of Engineering in Computer Science (CGPA: 8.01/10) 2023 – 2027

MSP Solai Nadar Boys HR Sec School Dindigul, India
Higher Secondary Certificate (HSC) (Score: 73%) 2022 – 2023

CERTIFICATIONS & COURSEWORK

NPTEL: Machine Learning (IIT Madras) | **Great Learning:** Generative AI for Beginners, HTML/CSS
Relevant Coursework: Database Management (DBMS), Operating Systems, Computer Networks, Software Engineering
Others: JavaScript (LinkedIn Learning), MongoDB Professional Certification
